SSI SCHAEFER

HEAVY DUTY STORAGE

Case Study of Scania (Malaysia) Sdn Bhd

Completion Date: DEC 2003

Project Value: USD 115,000

Warehouse Dimensions: 26.85 x 24x 9m (WxLxH)

Storage Capacity:

- 576 Pallet Locations
- 12,568 Picking faces

Schaefer Products Installed:

- Mobile Pallet Racking
- R3000 Modular Shelving
- Mezzanine Platforms
- Cantilever Racking
- Plastic containers

Project Objectives:

1. Relocation of existing parts warehouse located in Tractors Malaysia to own facility.
2. To provide enhanced warehouse facility and after sales services to cater for growing Scania trucks and buses.

The Scania (Malaysia) Sdn Bhd headquarters complex is strategically located along the North-South Highway, and is accessible to major ports. The complex spans 4 acres, and houses a fully equipped modern central workshop, state-of-the-art warehousing system as well as a Sales Operations Centre with ample car, truck and bus parking. Today, the Scania network in Malaysia covers all strategic transport points in Peninsular Malaysia, and in Sabah. A new workshop in Sarawak will be operational by January 2007.

Malaysia is the regional hub for Scania in South East Asia, covering markets such as Singapore, Thailand, Vietnam and Indonesia. This regional office is located at the Scania Bukit Jelutong complex, and also houses the regional training centre where mechanics, technicians, driver trainers and managers from the Asia Pacific region are trained to provide Scania customers the best possible service.

With fully owned subsidiaries and strategically located workshops in Malaysia, Singapore and Thailand, Scania is in the best position to provide a wide spectrum of quality products and the very best in after-sales services to suit our customers anywhere in the region.
