

# STRONG Foothold

Case Study of Kuehne + Nagel Australia

- Completion Date:** MAY 2006
- Project Value:** Undisclosed
- Warehouse Dimensions:** 20,000 M<sup>2</sup>
- Storage Capacity:**
- 12,248 Pallet Locations
- Schaefer Products Installed:**
- Double-Deep Pallet Racking

- Project Objectives:**
1. To optimize storage space - up to stacking height of 6 pallets high
  2. To provide forklift drivers with easier method of pallet positioning
  3. To install a system that provides increased strength & rigidity
  4. To construct a central facility that enhances Kuehne + Nagel 3PL business

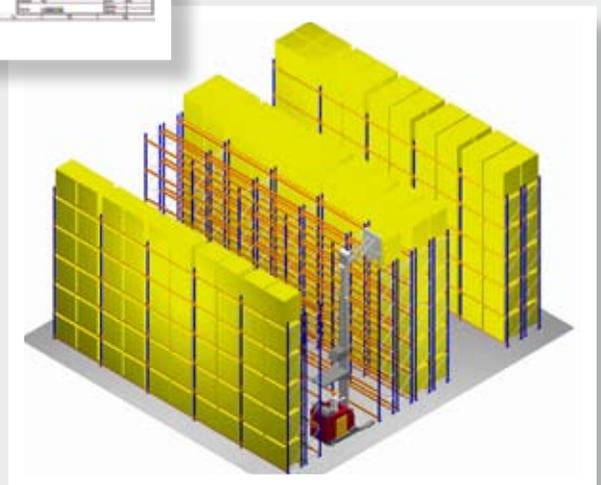

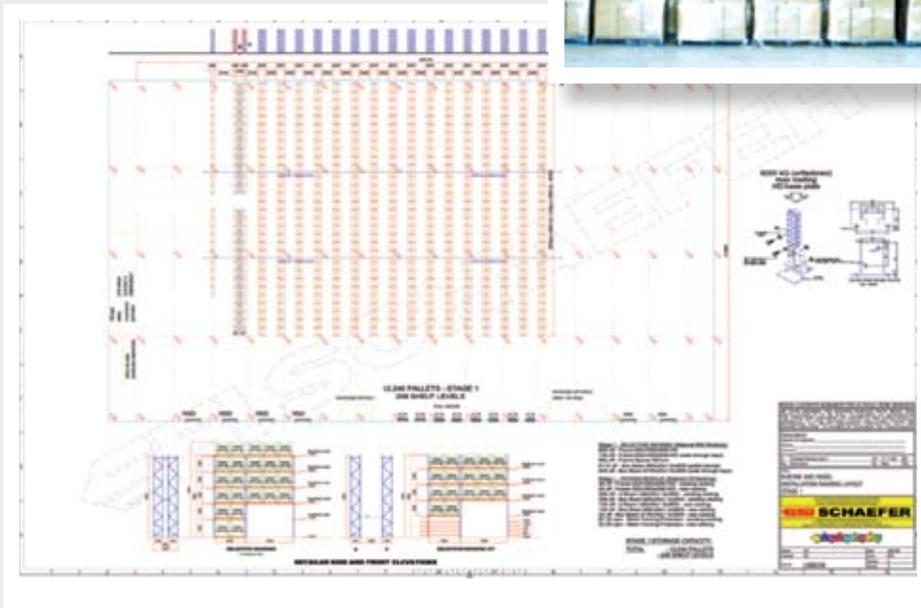

A global leader in integrated logistics, Kuehne + Nagel ranks among the top three contract logistics players worldwide. Judging by its track record to date, it's clear that Kuehne + Nagel demonstrates a formidable knowledge and understanding of what it takes to provide integrated logistics and supply chain logistics services for its customers anywhere in the world. The company was founded in 1890 and has more than 48,000 employees at 830 locations in more than 100 countries.

With over 30 years of operations in Australia, Kuehne + Nagel has recently added a new 20,000 square metre Distribution Centre to its global network of over 6 Million square metres of warehouse space at Derrimut, Melbourne in the state of Victoria. The facility is designed to accommodate over 20,000 SKUs for a diverse range of products from fast moving consumer goods (FMCG), through to pharmaceutical products and automotive component parts.

The SCHAEFER Interlock 600 racking was specially designed to offer greater flexibility with adjustable beam levels that allow for better cube utilization. Furthermore, the highly visible steel location pin presented an additional safety measure to warehouse staff and rack maintenance teams.
